

Integration File 1 Introduction

Introduction

Intent

The Integrating Committee's intent is to seek **broad-level** JAG acceptance of the basic concepts underlying the statements and recommendations. As far as possible we wish to avoid word-smithing. It is anticipated that a "writing team" will be charged to incorporate the accepted basic statements and recommendations (plus suggestions from JAG) into a draft JAG report and, in so doing, would have some latitude in modifying format and, where needed, crafting more concise language.

Recommendations

The recommendations of the Integration Committee (Linwood, Russ, Steve, and John) are contained in five files:

File 2. Composite of Integrating Committee documents that include:

- 1) JAG-Approved Overarching Goals
- 2) Demonstrations
- 3) Core Needs
- 4) JAG-Approved Economics Recommendations

File 3. Research Document

File 4. Landscape Document

File 3. Research, and File 4. Landscape are both stand-alone, complete sets of recommendations consisting of the original Committee documents with Integration Committee suggested modifications and substitutions. Suggested changes within Committee text are indicated in blue italics. We have also included some links to and language from the JDSF Management Plan.

In presenting these suggestions, the Integration Committee has attempted to remain faithful to the intent and concepts within the original Committee documents. Undoubtedly some errors have crept in, but hopefully these are few in number.

File 5. Research -- For reference, the original document from the Research Subcommittee.

File 6. Landscape -- For reference, the original document from the Landscape Committee.

The Integrating Committee will present Files 2-3 to JAG for discussion and for testing levels of acceptance at its April 15 meeting. Files 5 and 6 are primarily for reference.
